

## Product Uses

Nviroclean Spill Remediation Product does more than just clean up spills

- When used for spill remediation it is easy as 1. 2. 3... 1.apply generous amount onto spill. 2.work product into spill typically using a broom in a circular fashion. 3.pick up used product and place in container for reuse. When the product has lost its effectiveness simply place in a container for disposal.
- It also works great on carpet stains. Simply moisten the stain with water or preferred cleaner like our perfect solution. Apply Nviroclean to the stain. Apply pressure while working Nviroclean into the stain until the Nviroclean has turned the same color as the stain. Then either sweep up the Nviroclean or let dry and vacuum.
- Stain removal such as rust, mold dirt and grime on surfaces like concrete, tile, vinyl, wood and stucco. Wet the surface with water. Apply Nviroclean to the area to be cleaned. If the area is a vertical surface then apply Nviroclean to a stiff bristled brush. Applying pressure brush the Nviroclean into the surface until the Nviroclean turns the same color as the stain. And then simply rinse with water.
- Chemical free kitchen and bathroom cleanup. To clean toilets or urinals simply sprinkle Nviroclean in and brush clean with your typical toilet bowl brush and flush. It works basically the same way for your kitchen and bathroom sinks but you may want to use a rag instead. For oily pots and pans simply sprinkle in Nviroclean wipe it around until clean and dump it into the garbage. No more cooking oil down your drain! Don't forget Nviroclean is USDA approved for use around foods.
